5T, MAURITANIA

Bernd, DK3LQ, will be leaving Senegal (where he is currently active as DK3LQ/6W1) and hopes to be active in **5T-land, late March or early April** as **5T5MB**.

Cecil, NW8F (QSL Manager for Paul/**9L1PG** and Millie/**9L1MG**), has informed OPDX that Paul and Millie **will be leaving very soon** (possibly **May 15th**). NOTICE OF CANCELLATION

Ken, AE4EZ, reports his **DXpedition to Cocos Keeling (VK9/C) and Christmas Island (VK9/X)** was **cancelled** because he had to attend an emergency meeting at Tokyo. Ken plans to make another schedule in the future from these islands.

PIRATE ALERT!

3V8AS PIRATE (POSSIBLY)? Sources from Europe indicate that this may be a pirate (not even in 3V-land) and a scam that is taking place. The DXCC Desk does not accept 3V8AS cards at the present. You may be throwing away your greens stamps for nothing. Wait until there is a DXCC acceptance.

TT8AK PIRATE. Antoine, F6FNU, would like to let everyone know that this station is NOT legitimate. Also, this Chad callsign has not been re-issued.

QSL ROUTE

Matt, IK2SGC, from the (MC2) Contest "TEAM", says if you need a QSL card from any of the **IU2M, II2M, and II7M contest operations**, you can send it **by the bureau** or at the same time send Matt an E-mail message to his InterNet address: matt@galactica.it

QSL TIP!

with outgoing QSLs and some in coming. UK9AA uses him as a central collection point for his cards. Karl states he is really not his manager, but he or one of his engineers flies to Tashkent and Dushanbe each quarter and brings him his cards. Karl suggests using one of the following address:

CHRISTMAS ISLAND, VK9XM

In the latest in a series of VK9X operations from this newly established Christmas Island Casino Resort, Martti Laine, OH2BH will lead his family-team, Leena, OH2BE, and Petri, OH2KNB, to a well earned DX vacation over the Easter Holidays.

1996 will also see Martti taking up a new business location, while Petri will be finishing his British GCSE course at the Hong Kong German-Swiss International School.

An interesting feature of the current tour is that they have invented a truly portable DX-pedition station fitting into airline briefcase. With an overall weight of less than 20 pounds, it can be hand-carried, and it will deliver more than 1KW output using two Motorola MRF-154s and advanced switching power supply technology.

So listen to the kind of signal they can come from a Samsonite briefcase - with fully rated equipment along with the suncream and swimming suit.

The touchdown on Christmas will be April.06 for 5-day stay. You will find VK9XM in the vicinity of the usual DX frequencies on the bands where VK9XM can make the most of the band conditions.

QSL is via JA1BK.
